BUILDING PERFORMANCE

Essential quantifiable features of the project *(Note: For the whole or a specified part [e.g., communal areas only] of the project as appropriate):*

- Projected/ actual annual operating energy consumption (kWh/m²)
- Projected/ actual annual carbon emissions related to the operation
- Projected/ actual consumption of potable water (Litre/ person/ year)
- Measures taken to retain existing structures (if renovation), to use materials efficiently, to minimise use of scarce materials and to maximise use of recycled/salvaged materials
- Measures taken to reduce construction and operating solid and liquid wastes
- % of total planting area/ site area (may not be applicable for Existing Building category)
- Measures taken to optimise urban air ventilation/ minimise heat island (may not be applicable for Existing Building category)
- Measures taken to maximise the IEQ
- Evaluation of user satisfaction, including extent of occupant control on IEQ
- Notes on cost, preferably life-cycle cost
